

YTN was the sole STEM provider for after school programming at **Dumfries Elementary School** in Dumfries, VA, and **Drew Middle School** in Stafford, VA, a 2019-2020 21st Century Community Learning Centers grant recipient. Students at both schools received instruction on the theory and application of the engineering design process (EDP). Dumfries students successfully applied EDP to establish an improved process for the school's lost and found. Similarly, Drew students brainstormed initiatives to improve safety and comfort of students and faculty during the school day.
